(Applicant/Applicant's Representative Signature – if appropriate)

Continuation of Substance of Interview including description of the general nature of what was discussed: Examiner contacted applicant to discuss an examiner's amendment to cancel claims 19-21 since these three independent claims were almost identical to allowable claims 11, 15, and 1 but did not recite that the tongue control protrusion protruded from the surface of the beak receiving aperture. Claims 22 and 23 would be amended to positively recite that the tongue control protrusion protruding from a surface of the beak receiving aperture. Applicant approved the amendments. Please see attached examiner's amendment for further details of the changes..
